Interested in developing a commercial product that must utilize the latest technologies and put your skills on display to the world?
(It is also sort-of secret)

- Commercial product: Launch 2009
- Occasionally connected WPF application
- Must have a very compelling user experience that includes inking, media, styling and skinning
- Highly configurable for different business domains
- Back Office applications using ASP.NET
- Integration with COTS packages such as MS CRM

We need a user interface expert..

- WPF (or Silverlight)**
- C#.NET 3.5
- ASP.NET
- SQL Server 2008
- Microsoft Sync Framework 1.0
- WCF
- MS EntLib
- MS WPF Composite UI (Prism)
